DragonWave, Gogo Enabling Connectivity at 30,000 Feet

GOGO using DragonWave's Horizon Quantum and Horizon Compact+ to support service expansion on airline fleets and business jets

OTTAWA, CANADA--(Marketwired - Jan. 22, 2014) - DragonWave Inc. (TSX:DWI)(NASDAQ:DRWI) a leading global supplier of packet microwave radio systems for mobile and access networks, today announced it has been selected as a microwave solutions provider for backhaul connectivity as part of Gogo's ongoing expansion efforts. Gogo is a leading provider of in-flight services, having equipped more than 2,000 commercial aircraft and more than 6,500 business jets with its exclusive online solutions. The DragonWave Horizon Quantum and Horizon Compact+ radios offer the performance parameters for linking Gogo's remote tower locations back into a wired network.

"Our requirements are unique in that we needed to find a cost effective, reliable and quick solution to link our customers back into a wired network from our remotely positioned towers," said Anand Chari, Gogo's Chief Technology Officer. "We've selected DragonWave, as we've had a strong relationship with them over the past few years and have had reliable performance, service and support of the company's products, which, in turn, has helped us provide a reliable quality of service to our inflight customers"

DragonWave's links are designed into the Gogo network by Future Technologies Venture, LLC. "Future Technologies is very pleased to be the lead system designer and equipment provider on this innovative backhaul project," said Peter Cappiello, Future Technologies President.

Delivering up to 4 Gbps per link, Horizon Quantum split-mount system provides dual-channel capability and high spectral efficiency, capacity, and nodal intelligence, while occupying only half a rack unit and consuming the lowest power per bit of any solution today. Horizon Compact+ integrates a radio and modem into a single outdoor unit that delivers more capacity per channel than any other all-outdoor microwave system currently available.

"We've enjoyed helping support the unique vision Gogo is pursuing to provide airline travelers around the world with dependable inflight entertainment services," said Peter Allen, DragonWave President and CEO. "Probably the best compliment one gets from a customer is repeat business, and we're committed to help Gogo succeed as they expand their business of connecting passengers to the Internet at 30,000 feet."

About Gogo

Gogo is the global leader of in-flight connectivity and wireless in-flight digital entertainment solutions. Using Gogo's exclusive products and services, passengers with Wi-Fi enabled devices can get online on more than 2,000 Gogo equipped commercial aircraft. In-flight connectivity partners include Aeromexico, American Airlines, Air Canada, AirTran Airways, Alaska Airlines, Delta Air Lines, Frontier Airlines, Japan Airlines, United Airlines, US Airways and Virgin America. In-flight entertainment partners include Aeromexico, American Airlines, Delta Air Lines, Scoot and US Airways. In addition to its commercial airline business, Gogo has more than 6,500 business aircraft outfitted with its communications services.
